SUMMARY

AI Engineer with 3+ years on the front end (React, Next.js, TypeScript), integrating AI into systems: search that answers from documents and structured data extraction from free text. Sole front-end engineer of a production system a retail team uses every day.

WORK EXPERIENCE

Front-End Developer
Confidential Retail Client (freelance contract)
03/2026 - Present | Remote, Brazil

- Sole front-end engineer of an inventory and orders system used every day by 15 employees.
- Rebuilt the most-used flow, field visits and orders, for mobile: filling it in now takes about half the time.
- Write the API contracts the back-end developer implements; end-to-end tests and automated releases.
- Built the reports the team exports every day (spreadsheet, PDF and document).

Freelance Web Developer
Self-employed
01/2022 - Present | Remote, Brazil

- Built Exacta for a retail tax routine: a manual process went from 1 to 1.5 hours to 30 minutes, with more accurate values.

PROJECTS

Cortex - note-taking app with AI search
- Finds the text inside screenshots and answers questions, citing the note each answer came from.

Pitchfolio - AI assistant for freelance proposals
- Reads a job post, pulls out requirements and risks, and drafts the reply; its answers are checked by automated tests, including prompt injection.

Emerald UI - design system
- Nine components documented in Storybook, published from a monorepo.

AVAILABILITY

Open to freelance projects and remote roles. Based in Brazil (UTC-3), with overlap for US and European working hours.
