SUMMARY

Front-end developer with 3+ years of experience, specialized in React, Next.js and TypeScript, with working back-end and DevOps skills (Node.js, Docker, CI/CD). Currently the sole front-end engineer of a production inventory management system used daily by a retail company. Started out in web development at Trybe, with ongoing specialization at Rocketseat. Comfortable owning the full cycle: architecture, implementation, testing and deploys.

WORK EXPERIENCE

Front-End Developer

Confidential Retail Client (freelance contract)

01/2025 - Present | Remote, Brazil

- Sole front-end engineer of a production inventory and production-tracking web system (Next.js 15, React 19, TypeScript, Tailwind CSS).
- Integrated an external API with role-based authentication, protected routes and permission handling.
- Built rich reporting: XLSX, PDF and DOCX exports used in daily operations.
- Set up Playwright end-to-end tests, conventional commits and automated changelog releases (approx. 230 TypeScript files, 28 routes).

Freelance Web Developer

Self-employed

01/2022 - Present | Remote, Brazil

- Design, build and deploy web applications for clients and own products with React, Next.js and TypeScript.
- Shipped a cross-platform desktop inventory app with Tauri (Rust) and React (Exakta).
- Built a full-stack habit tracker: one Node.js API serving React web and React Native mobile clients.

SKILLS

Front-End: JavaScript (3 years), React (2 years), Next.js (1 year), TypeScript, Tailwind CSS, styled-components, Framer Motion, React Native, Tauri

Back-End: Node.js (2 years), Express, REST APIs, MySQL, Prisma, Sequelize, JWT authentication

DevOps: Docker, CI/CD (GitHub Actions), Vercel, release automation

Testing: Playwright (end-to-end), Jest, React Testing Library

Languages: Portuguese (native), English (professional)

EDUCATION

Trybe

Web Development, intensive program

01/2021 - 12/2022

- Certified in the Web Development Fundamentals module: Unix and Bash, Git and GitHub, HTML and CSS, JavaScript, DOM and unit testing.

Rocketseat

Ongoing specialization, 11 certificates

01/2024 - Present

- React Fundamentals and Advanced Hooks
- Next.js Fundamentals and Advanced
- Node.js Fundamentals and DDD in Node.js
- Design System
- DevOps Culture Fundamentals
- HTTP and Performance

PROJECTS

Pitchfolio - AI assistant for freelance proposals

<https://proposal-assistant-mocha.vercel.app>

- Reads a job post, extracts requirements and risks, and drafts a reply from saved case studies; tracks which proposals get replies.
- Provider-agnostic AI layer with automatic failover (Groq to Gemini), Zod-validated structured output, Supabase auth with row-level security and per-user rate limiting.

Emerald UI - design system with published Storybook

<https://ageumenezesdev19.github.io/05-design-system/>

- Nine components over seven token scales, documented in Storybook with the accessibility addon, built on Radix primitives.
- Five-package monorepo on Turborepo, versioned with Changesets, shipping the shared ESLint and TypeScript configs the other packages consume.

Exakta - exact-value stock search

<https://github.com/ageumenezesDev19/DesPensa->

- Solves a subset-sum search over a live inventory (which combination of products adds up to exactly this amount) in a Web Worker so the interface never blocks.
- Native desktop build with Tauri (Rust), multiple profiles with backup and restore, and offline-first persistence.

Developer portfolio - bilingual, serverless contact form

<https://github.com/ageumenezesDev19/ageumenezesDP2>

- React, Vite and TypeScript with an EN/PT content layer, dark and light themes, and a Vercel serverless function for email delivery. Lighthouse: 100 SEO, 100 accessibility.

AVAILABILITY

Open to freelance projects and remote roles. Based in Brazil (UTC-3), with overlap for US and European working hours.
